

APPENDIX C [Collision Reporting Model]

2.A.1 - Paper Collision Reporting (Current)

Last Modified: October 5, 2004

2.A.1 - Paper Collision Data Current.vsd

E-Collision Process Flow - December 27, 2004

1. Officer arrives at collision
OR
Officer is notified of collision by involved party
OR
Officer updates existing collision report

2. Officer initiates E-Collision, causing ORI #, Case # (if available), Badge #, Collision Date and Time to be entered/captured. For WSP investigated collisions, WSP Incident # and Collision Date and Time to be entered/captured. Officer completes report, using business edits on client or at precinct/detachment, and transmits it to Supervisor for review.
OR
Using some unique key (digits 3-7 of ORI # & Case # or WSP Incident # & Collision Date) to retrieve initial E-Collision, Officer updates or corrects collision information, or enters new information, using business edits on client or at precinct/detachment, and transmits it to Supervisor for review.

3. Supervisor reviews at precinct/detachment. Office application will have same functionality as that of client: e-collision/supplemental can be initiated, statistical reports run, and collision report printed out.

Does Supervisor approve E-Collision?

4. E-Collision is transmitted back to originating Officer for correction, after which E-Collision is re-submitted to Supervisor for approval.

YES
